

## Data Dissemination

Water Monitoring and Standards recognizes that availability of our monitoring data and results is as important as methods by which the data are collected and assessed. WM&S makes its monitoring data and results publicly available in a variety of ways. WM&S maintains a webpage ([www.state.nj.us/dep/wmm/](http://www.state.nj.us/dep/wmm/)) through which much of our data and reports are electronically available. Data generated by WM&S can also be downloaded from EPA's STORET database at <http://www.epa.gov/storet/dbtop.html>. Many of our reports are also available, electronically, from the New Jersey Environmental Digital Library at Rutgers University (<http://njedl.rutgers.edu/njdlib/>). Additionally, hard copies of many of our reports can be obtained by calling WM&S at (609) 292-1623.
